Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? Import a repository.

Required fields are marked with an asterisk (*).

Owner * Repository name *

Owner: davendiy / Repository name: *назва (e.g. python-course)*

Great repository names are short and memorable. Need inspiration? How about `cautious-funicular`?

Description (optional):

Public Anyone on the internet can see this repository. You choose who can commit.
 Private You choose who can see and commit to this repository.

Initialize this repository with:

Add a README file This is where you can write a long description for your project. Learn more about READMEs.

Add .gitignore .gitignore template: None Choose which files not to track from a list of templates. Learn more about ignoring files.

Choose a license License: None A license tells others what they can and can't do with your code. Learn more about licenses.

You are creating a public repository in your personal account

The screenshot shows the 'General' tab in the GitHub repository settings for 'davendiy / programming_1course'. A red circle highlights the 'Access' section, specifically the 'Collaborators' link. A red arrow points from this circle to a handwritten note '6' above the page. The 'Collaborators' section shows '0 collaborators have access to this repository. Only you can contribute to this repository.' Below it, there's a 'Manage' button.

The screenshot shows the 'Collaborators' tab in the GitHub repository settings for 'davendiy / programming_1course'. A red circle highlights the 'Collaborators' link under the 'Access' section. A red arrow points from this circle to a handwritten note '7' above the page. The 'Manage access' section displays a message: 'You haven't invited any collaborators yet' with a 'Add people' button. Handwritten text at the bottom right says 'Ты не можешь добавить ник, если у тебя нету ников' (You can't add a user if you don't have any users).

Створення гілки і завантаження файлів

GitHub repository page for `programming_1course`. The main branch is `main`, and there is one other branch, `example_hw1`. A modal window titled "Switch branches/tags" shows the selection of `example_hw1`. Handwritten notes include a circled "8" above the main branch dropdown, a circled "9" next to the modal title, and a large bracketed note "9 (каска з номром лабораторії)" pointing to the modal content. A circled "10" is on the left side of the screen.

GitHub repository page for `programming_1course`. The main branch is now `example_hw1`, and there are two branches (`example_hw1` and `main`). Handwritten notes include a circled "11" next to the `example_hw1` dropdown and a large bracketed note "11 (тепер ми маємо інші гілки)". A circled "12" is on the left side of the screen. The commit history shows a file named `lesson2` was added to the `example_hw1` branch.

GitHub repository page for `programming_1course`. The commit history shows a file named `lesson2` was added to the `example_hw1` branch. Handwritten notes include a circled "12" next to the commit message and a circled "13" next to the "Code" dropdown menu. A circled "14" is on the left side of the screen. The commit history also shows an initial commit for `README.md`.

Створення пулреквеста

A screenshot of a GitHub repository page for "davendiy / programming_1course". The repository is public and has 2 branches and 0 tags. A yellow banner at the top indicates "example_hw1 had recent pushes less than a minute ago". A red arrow points from the left margin to the "Compare & pull request" button, which is highlighted with a red circle. Other visible buttons include "Go to file", "Add file", and "Code". The repository description is "Перший курс програмування на пайтоні". The commit history shows "davendiy added lab1" and other commits like "lab1" and "lesson2". The README.md file contains the text "programming_1course" and "Перший курс програмування на пайтоні".

Open a pull request

Create a new pull request by comparing changes across two branches. If you need to, you can also [compare across forks](#).
